ITM

INDUSTRY EUROPE

ARENA FOR GLOBAL INDUSTRIAL TRENDS

The trade show is not only home to extensive exhibitions of industry leaders, but also to many conferences, debates and trainings. Each year, the four-day long ITM Industry Europe is developed around the knowledge of experienced experts and supported by key industry organizations, associations and institutions.

1000
exhibitors from
26 countries

26.500
m² of exhibition
space

18.573
professional
participants

The year 2020 will mark the ninety-second edition of the event!

ITM Industry Europe is the largest and most significant event for the Polish industrial sector and is listed among the key industrial events throughout Europe. The objective of the fair is to comprehensively present current trends and to promote industrial achievements globally. It is also an example of a perfect blend of industry, business and science; a place for market leaders to showcase specialist machinery, equipment and modern solutions as well as for scientific institutions to present the engineering achievements, innovations that get delivered to the industry, enabling it to increase the efficiency of equipment, optimize production and increase commercial attractiveness and competitiveness.

The strengths of ITM Industry Europe:

- presence of leading brands from Poland and abroad
- new developments in the industry
- extra events: conferences, seminars, discussion panels, machine demonstrations
- innovative products awarded with the MTP Gold Medal
- special sightseeing paths following the revolution trail 4.0
- support of the key industrial organizations, associations and institutions

ITM Industry Europe exhibition

• MACH-TOOL

- > Machining of metals
- > Automation and robotics

MODERNLOG
Trade Fair of Logistics,
Transport and Storage

4th
edition
of the event

Modernity, openness to change, innovative logistics – these are the features that make Modernlog so distinctive. Thanks to the fair being organized in conjunction with ITM Industry Europe, it is possible to showcase products and capabilities of the logistics, transport and warehousing industry to an international audience.

The event will feature solutions conforming to the concept of logistics 4.0 which assumes automation of processes, self-control and quick adaptation to changing conditions.

Modernlog exhibition:

- Equipment and devices for internal transport
- Transport automation
- MES, TMS, WMS software
- Warehouse management equipment
- Warehousing, transport and forwarding services
- Barcodes and automatic data identification systems
- Equipment for warehouses and production floors

Innovations for Logistics Industry (In4Log) has been a regular event at Modernlog for several years.

It is a spectacular show which provides an opportunity to eye witness the equipment for individual stages of storage, packaging and internal handling of goods. Such a unique presentation is a reflection of critical activities that take place in the area of internal logistics.

Modernlog Zones:

- Warehouse of the future
- Modern transport systems
- Solutions for E-commerce and omnichannel
- Software / IoT
- Contract logistics

Smart Warehouse Conference:

- preparation for the use of new technologies in logistics and warehousing
- participation in discussion panels for people seeking skills related to management and implementation of new solutions in the spirit of Logistics 4.0
- reaching out to key manufacturing and trade sectors

The Smart Warehouse conference was an important aspect on the agenda of the previous edition. It was there that over two hundred participants learnt how to improve warehousing processes in their companies and the event will be continued in 2020.

However, instead of classic presentations, the conference will feature a panel discussion addressed to manufacturers, suppliers and beneficiaries of warehouse automation solutions as well as representatives of the most important Polish publications.

3D SOLUTIONS

3D Printing and Scanning Trade Fair

3D SOLUTIONS Trade Fair for 3D Printing and Scanning is dedicated to professionals and will provide all participants with access to innovative devices and knowledge about additive technologies. The visitors will have the opportunity to see presentations of 3D printers and printouts, 3D scanners, consult experts and become familiar with the technology live. 3D SOLUTIONS takes place during the highly regarded and renowned ITM Industry Europe trade fair, which is a unique opportunity to present the products to an international audience, exchange valuable experiences and hold meetings with business partners from all over the world.

It is a unique event not only for entrepreneurs looking for solutions in 3D printing technologies for industry, but also for everyone looking for new developments. The fact that the trade fair is visited by representatives of such industries as automotive & aerospace, foundry, logistics, in which additive manufacturing are to be a part of the supply chain, makes participation in 3D SOLUTIONS fair an opportunity for every manufacturer, distributor or service provider of modern manufacturing technologies to engage in business cooperation.

Thematic scope:

- **3D printers:**
 - › Thermoplastic filament: FDM/FFF
 - › Light-cured resin: SLA, DLP, Polyjet
 - › Powder technologies: CJP, Binder jetting, SLS, SLM/DMLS, EBM, MJF
- **3D scanners**
- **3D printing and scanning services**
- **Virtualization of technological processes**

The fair is addressed to:

- Manufacturers and distributors of 3D printers
- Companies providing 3D scanning technologies
- Enterprises operating in the process virtualization industry

Industrial Subcontracting Exhibition

Subcontracting Meetings are an important part on the exhibition's agenda. These are specially arranged networking meetings that enable personal B2B meetings of subcontractors and customers looking to outsource some part of their production.

The meetings are highly popular every year. The last edition was record-breaking and saw 353 meetings for 138 participants from 14 countries (Belgium, Belarus, China, Finland, Germany, Holland, Hungary, Lithuania, Norway, Poland, Switzerland, Taiwan, Turkey, Ukraine).

Scope of Subcontracting exhibition

- Metal processing
- Plastics processing
- Rubber processing
- Composites processing
- Wood processing
- Electronics
- Electrical engineering
- Services to industry

SUBCONTRACTING is the Poland's largest exhibition for industry cooperation. The event is intended for domestic and foreign industrial subcontractors. Subcontracting has for years been a place for establishing long-lasting business relations between customers and contractors in the industrial sector. Nearly 80 exhibitors from Poland, Finland, Lithuania, Slovakia, Slovenia and Ukraine presented their flagship products at the last edition.

Clustering is strongly popularized during the Subcontracting exhibition, which is regularly partnered by several key organizations including Metalworking Cluster, National Key Cluster and Cluster Management Excellence.

"Our company once again takes part in the B2B meetings. I believe that it is the best form of establishing business contacts. Our company has been here for many years, and we consider it really worthwhile. The exhibition is a meeting spot for business".

**Karolina Kępska, APX Technologie,
member of Bydgoszcz Industrial Cluster.**
